

# TMI Education invites your participation in a unique professional development opportunity at NO COST

## Bring It!™

### A 24/7 Solution for Brain-Compatible Wellness, Teaching and Learning

## What is *Bring It!*™?

**Q:** What makes the *Bring It!*™ program unique?

**A:** *Bring It!*™ provides educators with 24/7 access to brain compatible teaching strategies and resources. It also provides ongoing virtual support in a variety of formats.

**Q:** What is the driving purpose of *Bring It!*™?

**A:** All too often we make critical decisions about teaching and learning in the absence of the best practice research that informs how the brain learns. TMI believes that all curricular and instructional decisions must reflect brain-based research. Therefore, it is equally essential that we provide you with the professional development experiences, tools and ongoing support necessary for performing your best across all learning environments.

**Q:** Why is the *Bring It!*™ solution needed?

**A:** The Covid-19 global pandemic has placed a tremendous challenge upon effective teaching and learning. Additionally, it has forced us to immediately reinvent schooling. Given such, teachers have been forced to adjust and adapt their craft within a very different, uniquely challenging and uncertain context - one that we may have imagined, yet never thought would be our reality. To this end, it is essential that educators receive the *right* support that will effectively mitigate these unprecedented hardships that have been imposed upon our professional and personal practice, both now and in the future.

**Q:** What are the major program components of the *Bring It!*™ solution?

**A:** The *Bring It!*™ solution is comprised of an effective blend of asynchronous and synchronous components. The asynchronous component provides participants with "anytime, anywhere" access to brain-compatible teaching strategies designed to ensure effective instruction at all levels and across all learning environments - physical, virtual and hybrid. The synchronous component provides participants with live/scheduled one-on-one and small group virtual conferences that allow for easy-access, sustained and embedded professional learning opportunities, and exchange of best-practice ideas and information. Additionally, informal weekly virtual chats among participants are provided to help reduce the inherent anxiety and stress.

To learn more call Dr. Jim Gamble at 888.864.6364 Ext.4 today!

*During these unpredictable times it is so important that ongoing and job-embedded professional development be available in virtual formats.*

## YOUR DISTRICT IS INVITED TO PARTICIPATE!

### The *Bring It!*™ Pilot Program!

*Bring It!*™ is an innovative and much needed professional learning solution developed by the TMI Education senior program and development team. It is currently undergoing evaluation. TMI Education is excited to invite you and your school district to participate in this unique month-long job-embedded professional learning program designed to equip teachers and school leaders with practical brain compatible instructional strategies across any learning environment - physical, virtual and hybrid. The program period is January 11-February 12, 2021.

**What You Get!** You can provide up to 25 members on your staff with "Anytime- Anywhere" access to sustained professional development, consultative support and multiple brain compatible instructional resources, including asynchronous learning videos. In addition, weekly virtual chats, 1:1 coaching sessions, and professional focus group sessions are ongoing and available, as requested by you.

**How you can join!** Simply, contact Dr. Jim Gamble at [jgamble@tmieducation.com](mailto:jgamble@tmieducation.com) with your request to take part in the *Bring It!*™ Professional Development Solution pilot. You will then receive a conformation email that explains how to access the resources and the overall process for evaluating the program.

**Information sessions!** Dr. Jim Gamble will answer your every question and further explain the details of *Bring It!*™ via "Go to Meeting" sessions that will be open to all those interested on: **December 3 and December 8th @3:30pm. To register, please email Dr. Jim directly by Friday, November 30th.** Please include 1) DISTRICT, 2) YOUR NAME and 3) YOUR CURRENT POSITION, and 4) the DESIRED INFO SESSION DATE.

Help us to "Bring It!"™
